

ALIUS BULLETIN

*

GUIDELINES FOR EDITOR CHECKLIST

A compact preflight list for keeping new ALIUS Bulletin pieces consistent with the published issue style.

FORMAT

Use before proofing, before PDF export, and again before publication.

EDITORIAL ROUTE

The published Bulletin look is the visual target.

Preflight

- Confirm the piece subtype: interview, conversation, podcast, commentary, review, or editorial note.
- Keep the published Bulletin look as the visual target, not the working Word-template look.
- Provide a title, abstract, keywords, contributor block, citation block, and running title.
- Keep pull quotes explicit and editor-approved. For interviews and conversations, aim for two to six excerpts.
- Use American-English punctuation conventions, ALIUS spacing rules, and APA references.
- Check front-matter wording carefully because historical issues differ in small human-edited ways.
- Run the local preflight and validation scripts before publishing a new standardized PDF.
